About Me

A passionate and driven Computer Science undergraduate with hands-on experience in website development, graphic designing entrepreneurship and much more. Founder of an online clothing startup, adept in full-stack web development, and a frequent winner of innovation and technology competitions. Want to know more? Visit www.nomanromane.site.

Experience

Live Car Auction Platform 2025
(University Project)

- Developed a fully functional live car auction platform from scratch using PHP, MySQL, HTML, CSS, and JavaScript.
- Implemented real-time bidding, category-based listings, and countdown timers aligned with UAE local time.
- Designed a responsive, modern UI with smooth animations and seamless user experience.
- Project deployed at motorbidz.live, demonstrating hands-on expertise in full-stack development and deployment.

UI/UX Designer - Home Automation 2025
System (University Project)

- Designed a high-fidelity Figma prototype for a smart home automation app focused on personalized user experience.
- Created user flows, wireframes, and interactive components for voice assistance, language settings, and accessibility features.
- Applied modern design principles to simulate real-world usability for IoT-based interfaces..
- Prototype Link: [Homix](#)
